FUND OBJECTIVE

The Fund seeks current income.

REASONS TO INVEST

INVESTMENT STRATEGY

- The Fund is a tactically-managed, fixed income credit fund employing strategies that focus on generating current income while mitigating risks and market volatility.
- The Fund seeks to achieve the investment objective by investing primarily in U.S. agency and non-agency CMBS and other commercial real estate related securities, such as REITs.
- The Fund utilizes a tactical investment strategy that leverages the Sub-Advisor's commercial real estate and fixed income portfolio management experience.
- The Sub-Advisor employs its comprehensive due diligence process on each investment, including, but not limited to, analysis of bond cash flows and analysis of property cash flows, sub-market vacancy and rental rates, potential lease rollovers, and potential capital expenditures on underlying collateral properties.

The **Income Opportunities Fund** employs an investment strategy that leverages the Sub-Advisor's experience and rigorous credit analysis seeking to limit risk while generating current income through price appreciation and trade-generated gains.

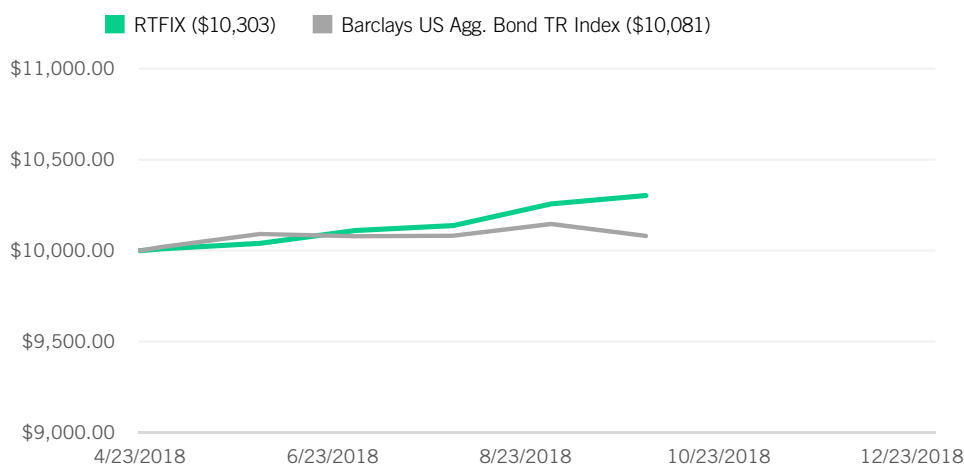

✓ Portfolio Strategy

- Seeks to combine stable monthly fixed coupon yields with price appreciation to generate a favorable rate of return for fixed income investors.

✓ Primary Investments of the Fund Include:

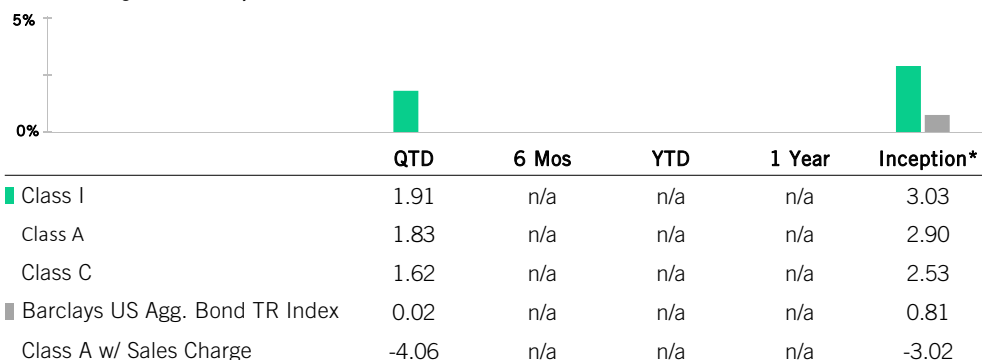

- Commercial Mortgage Backed Securities (CMBS)
 - Short duration CMBS that generates yields from fixed monthly coupon payments.
 - More short duration legacy CMBS credit bonds where the Sub-Advisor can anticipate price appreciation through due diligence and deleveraging of the underlying loans.
 - Longer duration CMBS managing interest rate risk and market conditions.
- Other commercial real estate structured securities, such as real estate investment trusts ("REITs").

Investors should carefully consider the investment objectives, risks, charges and expenses of the Rational Funds. This and other important information about the Fund is contained in the prospectus, which can be obtained by calling (800) 253-0412 or at www.RationalMF.com. The prospectus should be read carefully before investing. The Rational Funds are distributed by Northern Lights Distributors, LLC member FINRA/SIPC. Rational Advisors, Inc. and Cicero Capital Partners are not affiliated with Northern Lights Distributors, LLC.

Investing in the Fund carries certain risks. Investing in CMBS entails various risks: liquidity risks, interest rate risks, market risks, structural risks, geographical concentration risks; and in the case of non-agency CMBS, credit risk. Most CMBS are subject to risks associated with their structure and execution, including the process by which principal and interest payments are allocated and distributed to investors, how credit losses affect the issuing vehicle and the returns to investors in such CMBS. The value of the Fund may decrease in response to the activities and financial prospects of an individual security in the Fund's portfolio.

The Fund's investments in an underlying portfolio of exchange traded funds ("ETFs"), mutual funds and closed-end funds involve certain additional expenses and certain tax results, which would not be present in a direct investment in the underlying funds. The Fund may purchase and sell options on the same types of futures in which it may invest. Options on futures are similar to options on underlying instruments except that options on futures give the purchaser the right, in return for the premium paid, to assume a position in a futures contract (a long position if the option is a call and a short position if the option is a put), rather than to purchase or sell the futures contract, at a specified exercise price at any time during the period of the option. The Funds may invest in securities of real estate investment trusts ("REITs"). REITs are publicly traded corporations or trusts that specialize in acquiring, holding and managing residential, commercial or industrial real estate. Investments in the real estate industry involve particular risks. The real estate industry has been subject to substantial fluctuations and declines on a local, regional and national basis in the past and may continue to be in the future. Some securities held by the Fund may be difficult to sell, or illiquid, particularly during times of market turmoil. Illiquid securities may also be difficult to value. If the Fund is forced to sell an illiquid asset to meet redemption requests or other cash needs, the Fund may be forced to sell at a loss. Using derivatives or borrowing money to purchase securities can create leverage, which can amplify the effects of market volatility on the Fund's share price and make the Fund's returns more volatile. The use of leverage may cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations. Hedging is a strategy in which the Fund uses a derivative or other type of security to offset the risks associated with other Fund holdings. There can be no assurance that the Fund's hedging strategy will reduce risk or that hedging transactions will be either available or cost effective.
