## FUND OBJECTIVE

The Fund's investment objective is to seek long-term capital appreciation.

## REASONS TO INVEST

**Dedicated Allocation:**  
Consumer Spending Theme

**Risk-Managed Approach for Equity Investors**

## INVESTMENT STRATEGY

- The Fund pursues its investment objective by investing in a focused group (25-50 holdings) of the most attractive brands contained in the Alpha Brands Consumer Spending Index<sup>2</sup> (the "Index"). Security selection is driven by a combination of fundamental and technical factors.
- The Fund's objective is balanced between achieving attractive upside returns and managing downside risks.
- The Fund's investment process begins with the identification of the primary drivers of S&P 500 returns. Examples include companies with growth, value, size, momentum, strong balance sheets, and dividend yield.
- The Fund may invest, directly or indirectly through investments in exchange traded funds ("ETFs"), in both U.S. and foreign companies included in the Index.
- In times of economic turmoil or unusually high equity valuations where equity risk is deemed high, the Fund may also invest in cash and cash equivalents and in asset classes that have historically been safe havens when equities were experiencing drawdowns. De-risking decisions are driven by: Current equity trend, economic growth profile, consumer health, equity valuations & technicals, FED policy, interest rates, credit spreads, and asset class volatility trends.

Investing in the Fund carries certain risks. The value of the Fund may decrease in response to the activities and financial prospects of an individual security in the Fund's portfolio. These factors may affect the value of your investment. Investments in international markets present special risks including currency fluctuation, the potential for diplomatic and political instability, regulatory and liquidity risks, foreign taxations and differences in auditing and other financial standards. Risks of foreign investing are generally intensified for investment in emerging markets. Emerging market securities tend to be more volatile and less liquid than securities traded in developed countries.
