

## SUMMARY PROSPECTUS

May 1, 2025

### **Rational Dynamic Brands Fund**

Class A Shares: HSUAX

Class C Shares: HSUCX

Institutional Shares: HSUTX

Before you invest, you may want to review the Fund's complete prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund at <http://rationalmf.com/literature-forms/>. You can also get this information at no cost by calling 800-253-0412, emailing [info@rationalmf.com](mailto:info@rationalmf.com), or by asking any financial intermediary that offers shares of the Fund. The Fund's prospectus and statement of additional information, both dated May 1, 2025, are incorporated by reference into this summary prospectus and may be obtained, free of charge, at the website or phone number noted above.

## FUND SUMMARY – RATIONAL DYNAMIC BRANDS FUND

**Investment Objective:** The Fund’s investment objective is to seek long-term capital appreciation.

**Fees and Expenses of the Fund:** This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.** You may qualify for sales charge discounts on purchases of Class A shares if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund. More information about these and other discounts is available from your financial professional and is included in the sections of the Fund’s Prospectus entitled **How to Buy Shares** on page 141 and **Appendix A - Intermediary-Specific Sales Charge Reductions and Waivers**, and in the sections of the Fund’s Statement of Additional Information (“SAI”) entitled **Waivers and Reductions of Up-Front Sales Charge on Class A Shares** on page 90.

<b>Shareholder Fees</b> (fees paid directly from your investment)	<b>Institutional Shares</b>	<b>Class A Shares</b>	<b>Class C Shares</b>
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	4.75%	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lesser of original purchase price or the net asset value of shares at the time of redemption)	None	None <sup>(1)</sup>	1.00% <sup>(2)</sup>
Maximum Sales Charge (Load) Imposed on Reinvested Dividends and other Distributions	None	None	None
Redemption Fee	None	None	None
Exchange Fee	None	None	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	<b>Institutional Shares</b>	<b>Class A Shares</b>	<b>Class C Shares</b>
Management Fees	0.75%	0.75%	0.75%
Distribution (12b-1) Fees	None	0.25%	1.00%
Other Expenses (including shareholder services fee of up to 0.25%)	0.44%	0.46%	0.40%
<b>Total Annual Fund Operating Expenses</b>	<b>1.19%</b>	<b>1.46%</b>	<b>2.15%</b>

<sup>(1)</sup> In the case of investments of \$1 million or more (where you do not pay an initial sales charge and the selling broker receives a commission), a 1.00% contingent deferred sales charge (“CDSC”) may be assessed on shares redeemed within two years of purchase.

<sup>(2)</sup> Maximum Deferred Sales Charge on Class C shares applies to shares sold within 12 months of purchase.

**Example:** This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem (or you hold, as applicable) all your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and the Fund’s operating expenses remain the same, and the expense reduction/reimbursement remains in place for the contractual period only. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
Institutional Shares	\$121	\$ 378	\$ 654	\$ 1,443
Class A Shares	\$ 617	\$ 915	\$1,235	\$ 2,138
Class C Shares – no redemption	\$ 218	\$ 673	\$ 1,154	\$ 2,483
Class C Shares – with redemption	\$ 318	\$ 673	\$ 1,154	\$ 2,483

**Portfolio Turnover:** The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 340% of the average value of its portfolio.

### **Principal Investment Strategy**

The Fund pursues its investment objective by investing primarily in the stocks of 25 to 50 companies with the most attractive and leading brands, from a fundamental and technical perspective, contained in the Alpha Brands Consumer Spending Index (the “Index”). The Index tracks the performance of 200 highly recognizable and relevant U.S. and foreign brands with a business to consumer and business to business focus. Companies with a business to consumer focus primarily operate to create and sell products and/or services to the consumer on a direct basis or through intermediaries. Companies with a business to business focus generally create and sell products and/or services to other businesses, which are typically used to aid these businesses in serving their clients. The Fund’s strategy is based on the premise that consumption drives the U.S. economy with roughly 70% of U.S. Gross Domestic Product (“GDP”) derived from household consumption, and that brand loyalty, demographics, and incomes typically drive consumption habits.

Brands are assets owned by a corporation that often represent products and services to an end user. Companies sell products and services under a unique product name or “brand” that has built an emotional connection with customers over time and with large amounts of advertising dollars. The leading brands have embedded themselves in our daily lives and often inspire trust, loyalty and respect.

The Index measures the performance of 170 to 180 U.S. exchange listed companies and 20 to 30 non-U.S. exchange listed companies selected from 70 or more sub-industries that are deemed by the index provider’s rules-based methodology to have a large number of companies focused directly or indirectly on the consumer and consumer/business products and services. The number of non-US companies included in the Index will be determined at the investment committee’s discretion and based on the opportunities seen in non-US brands. The Index methodology is designed to track the leading companies by isolating those companies with the highest market cap, three-year total sales and three-year sales growth. By virtue of being at the top of these rankings, a company is deemed a “leading” company in its consumer-focused industry or its business to business focused industry. A company is excluded from the index if (i) it does not rank high enough to be eligible for inclusion based on the methodology described above at the time of initial calculation or in subsequent years’ reconstitutions; or (ii) it is acquired by another company where such acquired company’s shares cease trading on an exchange. The Index is equally weighted and is rebalanced and reconstituted annually in December. The Fund’s investment sub-advisor, Accuvest Global Advisors (the “Sub-Advisor”), is also the sponsor of the Index.

From the universe of securities in the Index, the Sub-Advisor selects the Fund’s portfolio based on its multi-step proprietary investment process. The Sub-Advisor uses fundamental and technical analysis to identify companies to include in the Fund’s portfolio. Fundamental analysis includes analyzing a company’s cash flow, sales, earnings per share, intangible assets, and similar statistics to identify companies that the Sub-Advisor believes have a competitive advantage over other companies. Technical analysis includes analyzing a company’s price movements over various time frames to identify the most attractive buy and sell levels, which helps identify the best time to buy or sell a particular security. The Fund may invest, directly or indirectly through investments in exchange-traded funds (“ETFs”), in both U.S. and foreign companies included in the Index, including through American Depositary Receipts (“ADRs”), and companies domiciled in emerging markets. Although the Fund may invest in companies of any market capitalization, it expects the market capitalization of the companies held in its portfolio to be \$2 billion and

above at the time of purchase. From time to time, the Fund may also invest in ETFs to gain exposure to particular consumer-focused and business to business focused industries. In times of economic turmoil or unusually high equity valuations where equity risk is deemed high, or other unfavorable conditions, the Fund may invest in cash and cash equivalents, inverse equity ETFs and in asset classes that have historically been safe havens when equities were experiencing drawdowns, which are U.S. treasury securities, short-term bonds, and the U.S. dollar. The Fund may invest across sectors, and at times might have individual positions that in the aggregate result in significant exposures to specific sectors, such as the consumer discretionary, consumer staples and financials sectors.

The process begins with the identification of the primary characteristics currently driving returns of S&P 500 companies. Examples of such characteristics include growth, value, size, momentum, strong balance sheet (i.e., high assets over liabilities, high total assets over total debt, high cash on balance sheet, low debt to equity ratio), profitability and dividend yield (a financial ratio that indicates how much a company pays out in dividends each year relative to its share price). Multiple baskets of companies included in the Index are then created based on these characteristics. Along with company fundamentals, the Sub-Advisor takes into account interest rate movements and U.S. dollar movements when analyzing stock and sector allocations. The investment process identifies important growth themes, employs single and multi-factor screens to identify those companies with the strongest fundamentals, and analyzes various technical and risk factors to select the companies with the most attractive current price. The Sub-Advisor, based on its fundamental and technical analysis, determines the appropriate weighting of the companies within the Fund's portfolio. Allocations of the portfolio's equity assets to cash, cash equivalents, inverse equity ETFs, and in asset classes that have historically been safe havens when equities were experiencing drawdowns, which are U.S. treasury securities, short-term bonds, and the U.S. dollar, are based on the Sub-Advisor's proprietary risk dashboard, which monitors current equity market technical indicators (important moving averages and crosses of those averages), macroeconomic fundamental indicators (valuations, GDP growth, inflation trends), as well as interest rate and U.S. dollar movements. The Fund's allocation of its assets to cash, cash equivalents, and protective ETFs may be significantly skewed towards cash and/or protective assets at times of high market stress.

The companies held by the Fund are sold when there is a change in fundamentals, the target price of the company is met, and/or the Sub-Advisor has identified better investment opportunities.

### **Principal Investment Risks**

As with any mutual fund, there is no guarantee that the Fund will achieve its objective. Investment markets are unpredictable and there will be certain market conditions where the Fund will not meet its investment objective and will lose money. The Fund's net asset value and returns will vary and you could lose money on your investment in the Fund and those losses could be significant. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

The following summarizes the principal risks of investing in the Fund. These risks could adversely affect the net asset value, total return and the value of the Fund and your investment.

**ADR Risk.** ADRs, which are typically issued by a bank, are certificates that evidence ownership of shares of a foreign company and are alternatives to purchasing foreign securities directly in their national markets and currencies. ADRs are subject to the same risks as direct investment in foreign companies and involve risks that are not found in investments in U.S. companies. ADRs may not track the price of the underlying foreign securities on which they are based, and their value may change materially at times when U.S. markets are not open for trading. Certain ADRs are not listed on an exchange and therefore may be considered to be illiquid.

**Cash or Cash Equivalents Risk.** At times, the Fund may have significant investments in cash or cash equivalents. When a substantial portion of a portfolio is held in cash or cash equivalents, there is the risk that the value of the cash account, including interest, will not keep pace with inflation, thus reducing purchasing power over time. Additionally, in rising markets, holding cash or cash equivalents may adversely affect the Fund's performance and the Fund may not achieve its investment objective.

**Credit Risk.** Credit risk is the risk that an issuer of a security will fail to pay principal and interest in a timely manner, reducing the Fund's total return. There is a risk that issuers will not make payments on fixed income securities held by the Fund, resulting in losses to the Fund. In addition, the credit quality of fixed income securities held by the Fund may be lowered if an issuer's financial condition changes. The issuer of a fixed income security may also default on its obligations.

**Emerging Market Risk.** Emerging market countries may have relatively unstable governments, weaker economies, and less-developed legal systems with fewer security holder rights. Securities law and the enforcement of systems of taxation in many emerging market countries may change quickly and unpredictably, and the ability to bring and enforce actions, or to obtain information needed to pursue or enforce such actions, may be limited. Companies in emerging market countries generally may be subject to less stringent regulatory, disclosure, financial reporting, accounting, auditing and recordkeeping standards than companies in more developed countries. As a result, information, including financial information, about such companies may be less available and reliable, which can impede the Fund's ability to evaluate such companies. Emerging markets usually are subject to greater market volatility, political, social and economic instability, uncertainty regarding the existence of trading markets, and more governmental limitations on foreign investment than are more developed markets. Emerging market economies may be based on only a few industries and security issuers may be more susceptible to economic weakness and more likely to default. Emerging market securities also tend to be less liquid, and the prices of such securities tend to be more volatile than the securities of issuers located in developed markets. Investments in emerging markets securities may be subject to additional transaction costs, delays in settlement procedures, unexpected market closures, and lack of timely information.

**Equity Securities Risk.** The price of equity securities in the Fund's portfolio will fluctuate based on actual or perceived changes in a company's financial condition and on market and economic conditions. Investor perceptions are based on various and unpredictable factors, including expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction; and global or regional political, economic and banking crises.

**ETF Risk.** Like a mutual fund, the value of an ETF can fluctuate based on the prices of the securities owned by the ETF, and ETFs are also subject to the following additional risks: (i) the ETF's market price may be less than its net asset value; (ii) an active market for the ETF may not develop or be maintained; and (iii) market trading in the ETF may be halted under certain circumstances. Because the Fund may invest its assets in ETFs that have their own fees and expenses in addition to those charged directly by the Fund, the Fund may bear higher expenses than a Fund that invests directly in individual securities.

**Fixed Income Risk.** The value of the Fund's investments in fixed income securities will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities owned by the Fund. In general, the market price of fixed income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Other risk factors include credit risk (the debtor may default), extension risk (an

issuer may exercise its right to repay principal on a fixed rate obligation held by the Fund later than expected), and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). These risks could affect the value of a particular investment by the Fund, possibly causing the Fund's share price and total return to be reduced and fluctuate more than other types of investments.

**Foreign Investment Risk.** Investments in foreign securities tend to be more volatile and less liquid than investments in U.S. securities because, among other things, they involve risks relating to political, social and economic developments abroad, including economic sanctions, as well as risks resulting from differences between the regulations and reporting standards and practices to which U.S. and foreign issuers are subject. Investing in foreign securities includes trading related risks (e.g., government supervision and regulation of foreign securities and currency markets, trading systems and brokers may be less than in the U.S., and foreign securities may be subject to foreign governmental restrictions such as exchange controls). All of the risks of investing in foreign securities are typically increased by investing in emerging market countries. Securities denominated in foreign currencies may be adversely affected by changes in currency rates and by substantial currency conversion costs.

**Inverse ETF Risk.** Investments in inverse ETFs will prevent the Fund from participating in market-wide or sector-wide gains and may not prove to be an effective hedge. During periods of increased volatility, inverse ETFs may not perform in the manner they are designed.

**Large Capitalization Stock Risk.** Investments in larger, more established companies are subject to the risk that larger companies are sometimes unable to attain the high growth rates of successful, smaller companies, especially during extended periods of economic expansion. Large capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Larger, more established companies may be unable to respond quickly to new competitive challenges, such as changes in consumer tastes or innovative smaller competitors, potentially resulting in lower markets for their common stock. During different market cycles, the performance of large capitalization companies has trailed the overall performance of the broader securities markets.

**Management Risk.** The investment strategies and models employed by the Sub-Advisor in selecting investments and asset allocations for the Fund may not result in an increase in the value of your investment or in overall performance equal to other similar investment vehicles having similar investment strategies. In addition, the Sub-Advisor's judgment about the attractiveness, value and potential appreciation of particular stocks or other securities in which the Fund invests may prove to be incorrect and there is no guarantee that the Sub-Advisor's judgment will produce the desired result. The measures that the Advisor, Sub-Advisors or portfolio manager use to monitor and manage the risks of the Fund may not accomplish the intended results and the Fund may experience losses significantly greater than expected.

**Market Risk.** The value of securities in the Fund's portfolio will fluctuate and, as a result, the Fund's share price may decline suddenly or over a sustained period of time. Overall market risks may also affect the value of the Fund. Factors such as economic growth and market conditions, trading and tariff arrangements, interest rate levels, and political events affect the securities markets.

**Mid/Small Cap Stock Risk.** Because the smaller companies in which the Fund may invest may have unproven track records, a limited product or service base and limited access to capital, they may be more likely to fail than larger companies.

**Sector Risk.** The Fund may focus its investments in securities of a particular sector. Economic, legislative or regulatory developments may occur that significantly affect the sector. This may cause the Fund's net asset value to fluctuate more than that of a fund that does not focus in a particular sector.

The Fund is subject to the following specific sector risks:

*Consumer Discretionary Sector Risk.* The success of consumer product manufacturers and retailers is tied closely to the performance of domestic and international economies, interest rates, exchange rates, competition, consumer confidence, changes in demographics and consumer preferences. Companies in the consumer discretionary sector depend heavily on disposable household income and consumer spending and may be strongly affected by social trends and marketing campaigns. These companies may be subject to severe competition, which may have an adverse impact on their profitability.

*Consumer Staples Sector Risk.* The consumer staples sector may be affected by the regulation of various product components and production methods, marketing campaigns and other factors affecting consumer demand. Tobacco companies, in particular, may be adversely affected by new laws, regulations and litigation. The consumer staples sector may also be adversely affected by changes or trends in commodity prices, which may be influenced by unpredictable factors.

*Financials Sector Risk.* Performance of companies in the financial sector may be adversely impacted by many factors, including, among others, government regulations, economic conditions, credit rating downgrades, changes in interest rates, and decreased liquidity in credit markets. The impact of more stringent capital requirements, recent or future regulation of any individual financial company, or recent or future regulation of the financial sector as a whole cannot be predicted.

**Turnover Risk.** The Fund may have a high turnover of the securities held in its portfolio. Increased portfolio turnover causes the Fund to incur higher brokerage costs, which may adversely affect the Fund's performance and may produce increased taxable distributions.

**Underlying Fund Risk.** Other investment companies, including ETFs ("Underlying Funds"), in which the Fund invests are subject to investment advisory fees and other expenses, which will be indirectly paid by the Fund. As a result, the cost of investing in the Fund will be higher than the cost of investing directly in the Underlying Funds and may be higher than other mutual funds that invest directly in stocks and bonds. Each of the Underlying Funds is subject to its own specific risks.

**U.S. Agency Securities Risk.** The Fund may invest in U.S. government or agency obligations. Securities issued or guaranteed by federal agencies and U.S. government sponsored entities may or may not be backed by the full faith and credit of the U.S. government.

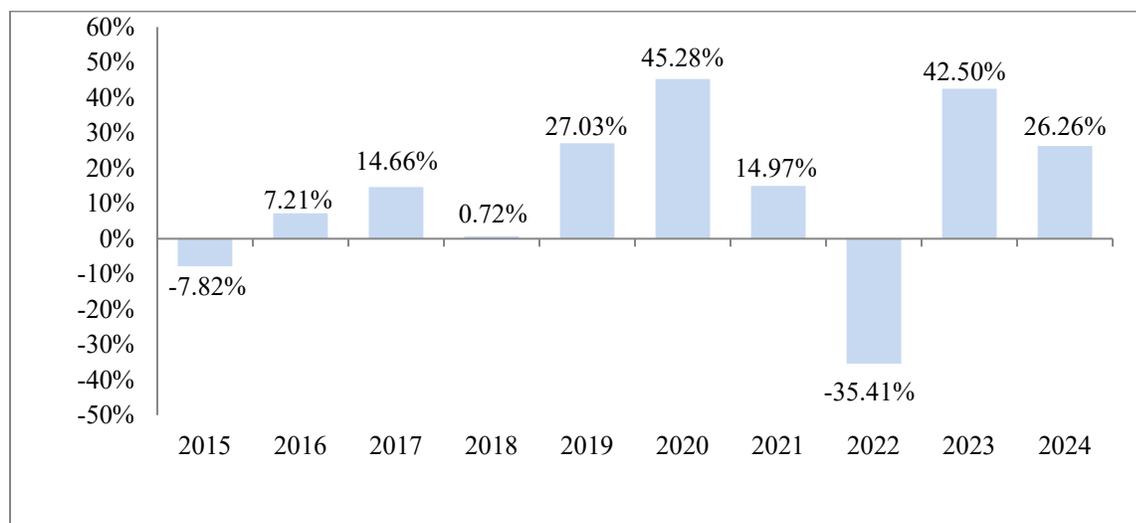

**Volatility Risk.** The Fund may have investments that appreciate or decrease significantly in value over short periods of time. This may cause the Fund's net asset value per share to experience significant increases or declines in value over short periods of time; however, all investments, long- or short-term, are subject to risk of loss.

For more information, please see the section of the Fund’s Prospectus entitled “Additional Information Regarding the Funds’ Principal Investment Strategies and Related Risks.”

**Performance:** The bar chart and accompanying table shown below provide an indication of the risks of investing in the Fund by showing the total return of its Institutional shares for each full calendar year, and by showing how its average annual returns compare over time with those of a broad-based market index and a supplemental index. How the Fund has performed in the past (before and after taxes) is not necessarily an indication of how it will perform in the future. Updated performance information is available at no cost by calling 1-800-253-0412.

The Fund changed its sub-advisor and investment strategy effective October 17, 2017. Performance information for periods prior to October 17, 2017, does not reflect the Fund’s current investment strategy and the Fund was not managed by the Fund’s current Sub-Advisor prior to October 17, 2017.

### Annual Total Returns

During the period shown in the bar chart, the highest return for a quarter was 31.12% (quarter ended June 30, 2020), and the lowest return for a quarter was (25.42)% (quarter ended June 30, 2022).

The Fund’s Institutional shares year-to-date return as of March 31, 2025, was (7.44)%.

**Average Annual Total Returns**  
**(For periods ended December 31, 2024)**

	<b>1 Year</b>	<b>5 Years</b>	<b>10 Years</b>
<b>Institutional Shares</b>			
Return Before Taxes	26.26%	14.18%	10.90%
Return After Taxes on Distributions	26.26%	12.27%	6.34%
Return After Taxes on Distributions and Sale of Fund Shares	15.55%	10.52%	6.66%
<b>Class A Shares</b>			
Return Before Taxes	19.96%	12.77%	10.06%
<b>Class C Shares</b>			
Return Before Taxes	25.05%	13.07%	9.89%
<b>MSCI ACWI Index (reflects no deduction for fees, expenses or taxes)<sup>(1)</sup></b>	18.01%	10.58%	9.79%
<b>S&amp;P 500 Total Return Index<sup>®</sup> (reflects no deduction for fees, expenses or taxes)<sup>(1)</sup></b>	25.02%	14.53%	13.10%

1. Effective August 30, 2024, the Fund changed its primary benchmark from the S&P 500 Total Return Index<sup>®</sup> to the MSCI ACWI Index because the MSCI ACWI Index is a more appropriate broad-based market index to compare the Fund's performance.

After-tax returns are calculated using the highest historical individual federal marginal income tax rate and do not reflect the impact of state and local taxes. Actual after-tax returns depend on a shareholder's tax situation and may differ from those shown. After-tax returns are not relevant for shareholders who hold Fund shares in tax-advantaged accounts or to shares held by non-taxable entities. After-tax returns are only shown for Institutional shares. After-tax returns for other share classes will vary.

**Investment Advisor and Portfolio Managers**

**Advisor:** Rational Advisors, Inc. is the Fund's investment advisor.

**Sub-Advisor:** Accuvest Global Advisors is the Fund's investment sub-advisor.

**Portfolio Managers:** David Garff, Chief Executive Officer and Chief Compliance Officer of the Sub-Advisor, and Eric M. Clark, Chief Investment Officer and Portfolio Manager of the Sub-Advisor, serve as the Fund's portfolio managers and are jointly and primarily responsible for the day-to-day management of the Fund's portfolio. They have each served as Portfolio Manager of the Fund since October 2017.

**Purchase and Sale of Fund Shares:** The minimum initial purchase for the Fund's Class A, Class C, and Institutional shares is \$1,000. For Class A and Class C shares, the minimum subsequent investment is \$50; for Institutional shares, the minimum subsequent investment is \$500. For Class A, Class C, and Institutional shares, the minimum initial and subsequent investment through the Automatic Investment Plan is \$50.

You may purchase and redeem shares of the Fund on any day that the New York Stock Exchange is open. Redemption requests may be made in writing, by telephone or through a financial intermediary to the Fund or the Transfer Agent and will be paid by check or wire transfer.

**Tax Information:** The Fund's distributions generally are taxable to you as ordinary income, capital gains, or some combination of both, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or individual retirement account, in which case your distributions may be taxed as ordinary income when withdrawn from the tax-advantaged account.

**Payments to Broker-Dealers and Other Financial Intermediaries:** If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
